

# **Application Instructions**

**Application Temp: 60° & Above**

## **Step 1**

Clean surface with 70% Isopropyl Alcohol wiping surface with kitchen paper towel. Make sure you have no wax or silicone based products on the surface.

## **Step 4**

SLOWLY peel back one side of the graphic release liner towards the center hinge. Be careful not to touch the adhesive side of graphic. Use scissors to cut away paper liner.

## **Step 2**

Put a piece of masking tape on each end of your graphic. Place your decal where you plan to install it and tape it into position.

## **Step 5**

Hold the graphic by the application tape. Beginning at the center hinge, squeegee making easy overlapping strokes pushing from the center of the graphic to the outsides of graphic in each direction. Remove the center hinge tape and remaining backing paper. Repeat on opposite side.

## **Step 3**

At the center of your graphic place a vertical line of masking tape to secure the graphic to the surface and create a center hinge. This step allows you to apply half of the graphic at a time.

## **Step 6**

Remove the application tape, peeling SLOWLY at a sharp 180 angle. If the decal appears to be lifting resqueegee and try again in opposite direction. If air bubble appears pop with pin (not a razor blade)

***"No Warning, Caution or Informational decals to be covered up by the installation of these decals."***
